

# Copperbonded Ground Rods

Our Copperbonded ground rods are manufactured with a solid core of drawn C1010-1020 steel. The copper jacket is electronically bonded to provide a permanent union between copper and steel resulting in a corrosion resistant rod which can be driven in almost any soil type. Where applicable, our rods meet or exceed U.L. requirements.

| Catalog # | Rod Diameter<br>(Inches x Length/Ft) | Approx.<br>Ship Wt.<br>(per 100 pcs) | Std. Pkg.<br>Qty. |
|-----------|--------------------------------------|--------------------------------------|-------------------|
| PLH-586C  | 5/8 x 6                              | 520                                  | 10                |
| PLH-588C  | 5/8 x 8                              | 690                                  | 10                |
| PLH-5810C | 5/8 x 10                             | 865                                  | 10                |
